PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 5+ years of experience architecting, building, and scaling enterprise software, SaaS platforms, ERP systems, AI-powered applications, and high-performance web and mobile products. Specialized in transforming complex business requirements into scalable technical solutions by combining software architecture, backend engineering, frontend development, cloud infrastructure (AWS/GCP), DevOps practices, and AI integration (PyTorch, LLMs, RAG). Experienced in leading engineering teams, mentoring developers, collaborating directly with founders and stakeholders, defining technical roadmaps, and delivering robust products from concept to production. Passionate about building maintainable, high-availability systems that solve real business problems and create measurable value.

ENGINEERING PROFILE

Product Development

Enterprise SaaS Platforms • ERP Solutions • CRM Systems • E-Commerce Platforms • Marketplace Applications • Admin Dashboards • Vendor Portals • Customer Platforms • AI-powered Applications • Mobile Applications

Architecture & Engineering

• Software Architecture • System Design • Distributed Systems • Microservices • REST APIs & WebSockets • Authentication & RBAC • Database Design • Performance Optimization • Clean Architecture • SOLID Principles • Design Patterns • Cloud Deployments & CI/CD

Business Understanding

• Requirement Gathering • Product Discovery • Sprint Planning • Technical Roadmaps • Feature Prioritization • Stakeholder Communication • Agile Development • Risk Management • Production Releases • Technical Documentation

CORE TECHNOLOGIES & TECHNICAL PROFILE

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL
- **Backend Engineering:** Python · FastAPI · Django · Django REST Framework (DRF) · Flask · Node.js · Express.js · REST APIs · WebSockets · RabbitMQ
- **Frontend & Mobile:** React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Material UI, Redux Toolkit, Component Architecture
- **AI / Machine Learning:** PyTorch, Transformers, LLM Fine-Tuning, Tokenization, Model Evaluation, Inference Optimization, Prompt Engineering, RAG Patterns
- **Databases & Storage:** PostgreSQL, MongoDB, MySQL, Redis, Database Optimization, Caching Protocols
- **Cloud & DevOps:** AWS (Lambda, S3, API Gateway, DynamoDB), Google Cloud Platform (GCP), Docker, Kubernetes, Linux, Nginx, CI/CD Pipelines (GitHub Actions)
- **Testing & Quality Assurance:** Pytest, Jest, React Testing Library, Unit Testing, Integration Testing, Code Reviews, SOLID Principles
- **Architecture:** Microservices Architecture · Event-Driven Architecture · Service-Oriented Architecture (SOA) · Distributed Systems · API Design · Scalability · System Integration
- **Real-Time Systems:** WebSockets · Socket.IO · Real-Time Communication · Event-Driven Messaging · Asynchronous Processing

PROFESSIONAL EXPERIENCE

Senior Software Engineer · Engineering Consultant

HOLY ROCK GREEN FLAG · Riyadh, Saudi Arabia (Working from Chennai) · Oct 2025 – Present · On-site

Key Impact: Built scalable backend architecture | Improved deployment reliability | Increased overall application performance

- Architect enterprise backend systems and microservices using Python (FastAPI, Django, DRF) to support high-concurrency production workloads.
- Design scalable microservice-based solutions and cloud architecture capable of supporting enterprise-scale operations.
- Develop AI-powered applications leveraging PyTorch, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG) patterns.
- Optimize PostgreSQL and MySQL databases for maximum throughput, latency reduction, and high availability.
- Collaborate closely with product owners, business stakeholders, and engineering teams to transform complex requirements into production solutions.
- Elevate engineering standards through automated testing (Pytest), rigorous code reviews, technical documentation, and developer mentoring.
- Lead cloud deployment strategies and automated CI/CD workflows on Google Cloud Platform (GCP) and AWS.

Tech Stack: Python · FastAPI · Django · DRF · PyTorch · LLMs · Microservices · GCP · AWS · Docker · Kubernetes · PostgreSQL · MySQL · Redis · CI/CD

TECHNICAL PROJECT LEAD · Full Stack Engineer

ADIYA BUSINESS SOLUTION · Mumbai, India · Apr 2025 – Sep 2025 · Hybrid

Key Impact: Reduced production defects dramatically | Accelerated overall engineering delivery speed

- Managed the complete software delivery lifecycle from initial requirement gathering through product discovery to production deployment.
- Led sprint planning, technical estimations, risk management, and release engineering across cross-functional teams.
- Designed scalable React architecture utilizing reusable design system components and modular component libraries.
- Interfaced directly with founders and business stakeholders to align technology solutions with business growth objectives.
- Drove engineering performance, maintainability, code accessibility, and modern frontend standards.
- Established full testing strategies using Jest and React Testing Library to ensure high production stability.

Tech Stack: React · Next.js · Python · FastAPI · Node.js · Express.js · Jest · React Testing Library · TypeScript · Docker · CI/CD

Technical Lead · Full Stack Engineer

ADIYA BUSINESS SOLUTION · Mumbai, India · Apr 2023 – Mar 2025 · Hybrid

Key Impact: Delivered 8+ major enterprise product platforms | Architected high-scale distributed backend systems

- Led cross-functional engineering teams in delivering major enterprise products: Enterprise E-Commerce Platform, AI-enabled Admin Panel, Vendor Management Portal, Customer Web App, React Native Mobile Apps, CRM, ERP, and Service Marketplace.
- Defined complete software architecture, distributed backend services, RESTful APIs, authentication protocols (JWT), RBAC, and real-time WebSockets.
- Mentored mid-level and junior software engineers through architecture discussions, paired programming, and structured code reviews.
- Managed production container deployments, release planning, and system infrastructure maintenance.
- Collaborated directly with founders, clients, UI/UX designers, QA engineers, and business leaders to drive product ownership from concept to launch.

Tech Stack: React · React Native · Python · FastAPI · Node.js · Express.js · WebSockets · RBAC · Docker · PostgreSQL · MongoDB · Redis · CI/CD

Full Stack Engineer

ADIYA BUSINESS SOLUTION · Mumbai, India · Jan 2023 – Apr 2023 · Hybrid

Key Impact: Built core ERP/CRM modules | Strengthened system security and access controls

- Engineered core modules for custom Enterprise ERP and CRM platforms.
- Constructed secure, high-performance REST APIs using Node.js and Express.js.
- Implemented secure authentication and granular Role-Based Access Control (RBAC) protocols.
- Designed MongoDB schemas and optimized database queries for application performance.
- Collaborated with senior engineers to troubleshoot production issues and improve application reliability.

Tech Stack: React · Node.js · Express.js · JavaScript · MongoDB · REST APIs · JWT · RBAC · Git

Frontend Developer · Trainer

NEXTGENDEVGITORG · Mumbai, India · Jan 2022 – Dec 2022 · Remote

Key Impact: Trained and mentored junior engineers | Engineered high-performance web applications

- Delivered end-to-end frontend solutions for client projects and freelance platforms.
- Mentored aspiring junior developers, conducted technical mock interviews, and delivered hands-on React training sessions.
- Conducted code reviews and guided developers on React best practices, component architecture, and debugging.
- Optimized application performance through lazy loading, code splitting, intelligent caching, and rendering optimization.
- Integrated REST APIs and handled asynchronous data flows across business applications.
- Improved overall web accessibility (WCAG), performance scores, and community engineering practices.
- Collaborated with developers and stakeholders to understand requirements and deliver frontend features.

Tech Stack: React · TypeScript · Redux · Performance Optimization · Web Accessibility · Git

Frontend Developer Intern

NEXTGENDEVGITORG · Mumbai, India · Jan 2021 – DEC 2021 · Remote

Key Impact: Successfully integrated into production agile workflows

- Built clean, responsive user interfaces utilizing HTML5, CSS3, JavaScript, and React.
- Gained solid foundations in software engineering principles, component architecture, and agile methodologies.
- Collaborated actively with senior engineering teams on production-level projects.
- Developed reusable React components following component-based architecture and maintainable coding practices.
- Implemented responsive layouts and cross-browser compatible interfaces for web applications.

Tech Stack: HTML5 · CSS3 · JavaScript · React · Git

SELECTED MAJOR PROJECTS DELIVERED

- **Enterprise ERP Platform:** Designed and developed complex modules for HR, Payroll, Attendance, Inventory, Operations, Sales, and Reporting with secure multi-tenant authentication, workflow automation, and real-time executive dashboards.
- **AI-Powered E-Commerce Platform:** Built an end-to-end e-commerce ecosystem including customer web application, admin dashboard, vendor portal, React Native mobile apps, payment gateways, inventory management, order processing, and AI-assisted features.
- **Enterprise CRM Platform:** Designed customer relationship management software supporting lead management, workflow automation, advanced reporting, communication tracking, and role-based permissions.
- **Real-Time Marketplace Platform:** Developed scalable real-time booking and service marketplace applications utilizing WebSockets, Node.js, Express, React, and MongoDB.

LEADERSHIP & PRODUCT OWNERSHIP HIGHLIGHTS

- Led engineering teams across multiple high-stakes enterprise projects.
- Conducted architectural reviews, technical roadmapping, and system planning.
- Mentored junior and mid-level software engineers to build strong team engineering practices.
- Collaborated directly with founders, executive leaders, and client stakeholders.
- Managed project timelines, sprint planning, engineering effort estimation, and resource allocation.
- Ensured rigorous code quality through continuous automated testing, code reviews, and engineering standards.
- Delivered products end-to-end from concept through architecture to production support.

EDUCATION & PERSONAL DETAILS

Dr. A.P.J. Abdul Kalam University

Bachelor of Engineering (Computer Science) · 2019 – 2023 · Graduated with First Division (CGPA: 7.28)

Languages Spoken: English, Hindi, Arabic, Urdu

Date of Birth: 09 September 2001
