PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience architecting, building, and scaling enterprise software, SaaS platforms, ERP systems, AI-powered applications, and high-performance web and mobile products.

Specialized in transforming complex business requirements into scalable technical solutions by combining software architecture, backend engineering, frontend development, cloud infrastructure, DevOps practices, and AI integration.

Experienced leading engineering teams, mentoring developers, collaborating with founders and stakeholders, defining technical roadmaps, and delivering products from concept to production. Passionate about building maintainable systems that solve real business problems and create measurable value.

ENGINEERING PROFILE

Product Development

- Enterprise SaaS Platforms
- ERP Solutions
- CRM Systems
- E-Commerce Platforms
- Marketplace Applications
- Admin Dashboards
- Vendor Portals
- Customer Platforms
- AI-powered Applications
- Mobile Applications

Architecture & Engineering

- Software Architecture
- System Design
- Distributed Systems
- Microservices
- REST APIs & WebSockets
- Authentication & RBAC
- Database Design
- Performance Optimization
- Clean Architecture
- SOLID Principles
- Design Patterns
- Cloud Deployments & CI/CD

Business Understanding

- Requirement Gathering
- Product Discovery
- Sprint Planning
- Technical Roadmaps
- Feature Prioritization
- Stakeholder Communication
- Agile Development
- Risk Management
- Production Releases
- Technical Documentation

CORE TECHNOLOGIES

- Languages** : Python • JavaScript (ES6+) • TypeScript • SQL
- Frontend** : React.js • Next.js • HTML5 • CSS3 • Tailwind CSS • Material UI
- Backend** : Node.js • Express.js • FastAPI • Django • REST APIs • WebSockets • Microservices
- Mobile** : React Native
- Databases** : PostgreSQL • MongoDB • MySQL
- AI / Machine Learning** : PyTorch • Transformers • LLM Fine-Tuning • Tokenization • Model Evaluation • Inference Optimization • Prompt Engineering
- Cloud & DevOps** : Google Cloud Platform (GCP) • AWS • Docker • Linux • CI/CD
- Testing** :Pytest • Jest • React Testing Library • Unit Testing • Integration Testing
- Tools** :Git • GitHub • Jira • Postman • VS Code

PROFESSIONAL EXPERIENCE

HOLY ROCK GREEN FLAG ENGINEERING CONSULTANT (Saudi Arabia, Riyadh)

Senior Software Engineer

Oct 2025 – Present | Chennai | On-site

Responsibilities

- Architect enterprise backend systems using Python (FastAPI & Django).
- Design scalable microservice-based solutions capable of supporting production-scale workloads.
- Develop AI-powered applications using PyTorch and Large Language Models.
- Optimize PostgreSQL and MySQL databases for performance and scalability.
- Collaborate closely with product owners, stakeholders, and engineering teams to transform business requirements into scalable technical solutions.
- Improve engineering quality through automated testing, code reviews, technical documentation, and mentoring.
- Support cloud deployment strategies and CI/CD workflows on Google Cloud Platform.

Business Impact

Built scalable backend architecture	Reduced production defects
Improved deployment reliability	Accelerated engineering delivery
Increased application performance	

ADIYA BUSINESS SOLUTION (Mumbai)

Full Stack Engineer | Project Manager

Apr 2025 – Sep 2025 | Mumbai | Hybrid

Key Achievements

- Managed complete software delivery lifecycle from requirement gathering to production deployment.
- Led sprint planning, engineering estimations, and release management.
- Designed scalable React architecture with reusable components and modular design systems.
- Worked directly with business stakeholders to align technology with business objectives.
- Improved frontend performance, maintainability, and engineering standards.
- Established testing strategy using Jest and React Testing Library.

Technical Lead | Full Stack Engineer

Apr 2023 – Mar 2025 | Mumbai | Hybrid

Major Products Delivered

• Enterprise E-Commerce Platform	• Vendor Management Portal	• React Native Mobile Applications
• AI-enabled Admin Panel	• Customer Web Application	• CRM Platform

- ERP Platform
- Service Marketplace

Leadership

- Led cross-functional engineering teams.
- Mentored developers through architecture discussions and code reviews.
- Defined software architecture for enterprise-scale applications.
- Managed production deployments and release planning.
- Collaborated directly with founders, clients, designers, QA engineers, and business teams.

Engineering Contributions

- Developed scalable frontend and backend applications using React, React Native, Node.js, and FastAPI.
- Designed REST APIs, authentication systems, RBAC, WebSocket services, and distributed backend architectures.
- Delivered high-performance software with emphasis on maintainability, scalability, and user experience.

Full Stack Engineer

Jan 2023 – Apr 2023 | Mumbai | Hybrid

Highlights

- Built ERP and CRM platforms.
- Developed secure backend APIs.
- Implemented authentication and role-based access control.
- Created reusable frontend architecture.
- Optimized application performance through lazy loading, code splitting, caching, and rendering optimization.

NEXTGENDEVGITORG

Frontend Developer

Sep 2022 – Dec 2022 | Mumbai | Remote

- Developed responsive React applications using TypeScript.
- Built reusable UI components.
- Integrated REST APIs.
- Improved accessibility and performance.
- Participated in engineering discussions and code reviews.

Frontend Developer | Trainer

Jan 2022 – Dec 2022 | Mumbai | Remote

- Delivered frontend solutions for freelance clients.
- Mentored junior developers.
- Conducted mock interviews.
- Provided React training.
- Helped improve engineering practices within the community.

Frontend Developer Intern

Jan 2022 – Jun 2022 | Mumbai | Hybrid

- Built responsive user interfaces.
- Worked with HTML5, CSS3, JavaScript, and React.
- Learned software engineering fundamentals.
- Collaborated with engineering teams on production projects.

SELECTED PROJECT EXPERIENCE

Enterprise ERP Platform

Designed and developed modules for HR, Payroll, Attendance, Inventory, Operations, Sales, and Reporting with secure authentication, workflow automation, and real-time dashboards.

AI-Powered E-Commerce Platform

Built an end-to-end e-commerce ecosystem including customer web application, admin dashboard, vendor portal, React Native mobile apps, payment integration, inventory management, order processing, and AI-assisted features.

CRM Platform

Designed customer relationship management software supporting lead management, workflow automation, reporting, communication tracking, and role-based permissions.

Real-Time Marketplace Platform

Developed scalable real-time booking and service marketplace applications using WebSockets, Node.js, React, and MongoDB.

LEADERSHIP & PRODUCT OWNERSHIP

- Led engineering teams across multiple projects.
- Conducted architecture reviews and technical planning.
- Mentored junior and mid-level engineers.
- Worked directly with founders and clients.
- Managed project timelines and sprint planning.
- Estimated engineering efforts and resource allocation.
- Ensured code quality through reviews and engineering standards.
- Delivered products from concept through production support.

EDUCATION

Bachelor of Engineering (Computer Science) 2019 – 2023

CGPA: 7.28

Graduated with First Division

LANGUAGES

English , Hindi , Arabic , Urdu

DOB

09/09/2001
